Legally, this document constitutes a contract, so it does need to be filled out properly. If there are mandatory fields missing, we will need to get a written request to amend via e-mail. The minimally mandatory items appear **bolded** below.

Contact Information – The contact information for the company or private party submitting the sample. We minimally just need **enough information to identify you and send the report/invoice**, all fields do not need to be filled. Please make sure we have your e-mail address to send the report/invoice to legibly written.

Project Information – Any identifying information you want in the report header; name, address, description, etc. All fields do not need to be filled. Optional.

Reporting Method— Please indicate whether you would like the report by e-mail or other method (fax, mail, etc.). You can also use this field for your e-mail address if easier. If nothing is indicated, we will default to e-mail. Optional.

Relinquished by/Via/Date and Time – Fill out in order to ensure unbroken chain of custody. Optional.

Test and TAT – This is where you request your asbestos testing and additional parameters.

Column 1 – "PLM Standard Methods" The standard bulk asbestos testing is "Standard" PLM with CVE. **Mandatory**.

Column 2 – "PLM Options" Homeowners will generally not need to worry about this. Optional.

Column 3 – "Other Analysis" Homeowners will generally not need to worry about this. Optional.

Column 4 – "Turnaround Time" We offer non-account holders Rush (half day) and 3-Day turnaround options. The associated charges are \$300 for Rush (includes up to 5 samples) and \$100 for 3-Day (includes up to 5 samples). **Mandatory.**

Samples – A table of all included samples.

Column 1 – "Sample ID" Each individual sample must have a "Sample ID" entry that exactly matches the sample bag label. Generally you will just want to number them 1, 2, 3, etc. or A, B, C etc., but any labeling is fine as long as it matches the sample bag labels exactly and uniquely. **Mandatory.**

Columns 2 and 3 – "Description" and "Location" These columns allow you to record the material type and sampling location so that you can easily identify individual materials on the report. Optional.

Other columns – Homeowners will not need to worry about these.

In summary, the minimum information required is:

- Enough "Contact Information" to identify and contact you as necessary
- Testing selected in "PLM Standard Methods"
- "Turnaround Time" selected
- A "Sample ID" for each sample that uniquely matches a single sample bag label.

That's it! If you have further questions, feel free to send us an e-mail at lnfo@PELLabs.com

CORRECTLY FILLED OUT COC:
